

I support XM radio and the right for the weather channels and traffic reports to be broadcasted. I travel for a living, and use XM's radio for the weather, especially in southwest Kansas, and North West Oklahoma as we are in tornado alley. I can always find out the weather with XM, where in a lot of areas I can not recieve regular fm or am radio because it is so remote. Please keep XM radio's right alive to broadcast these channels. Thank you, Carla Gilmore
